

NEW!  **MONITOR^{BM}**

On-The-Go Handheld

Monitor's On-The-Go solution is a mobile application that runs on our android powered mobile device. It processes bus trips, events and items for sale on or off site where there is a 4G or WiFi connection to Supervisor Net.

NEW Handheld Device Benefits:

Re-designed Case

A new robust, user friendly and ergonomic handheld device where form was a factor.

Lower Cost

Our new OTG solution is priced just right, which means better return in this investment.

Extended Capabilities

Reads Mag, Mifire, barcode or QR cards, making this a compatible option for all environments.

Generic Mounts

No need to fork out for a specific mount for this machine, can now fit in generic mounts available direct from retailers.

Larger Screen

This one piece unit now comes with a 5.5" LCD screen, perfect to see the details on screen but small enough to not take up vital space.

Easy to use

Can be easily self administered to add and remove items and prices. Users photos are displayed on screen for enhanced transactional security.

On-The-Go is a key part of our Commerce Suite of solutions. Payments can be made using a campus card, users phone or other campus identifier. It can be placed in a pocket, or mounted for security. It's truly capable to be ready On-The-Go.
