

Computer  
Reservation

# Organise, Customise, Monetise

Whether you're wanting to create a revenue stream or simply organise your facilities, Monitor Computer Reservation manages the day-to-day Computer booking admin, with highly configurable options and the ability to enforce limits, quotas and charges.

## Easy for Users, Easy for You

A simple and interactive administration console means users are easily confirmed through existing access or ID cards. Guest users are at no disadvantage, with one-off booking tickets. All bookings are updated in real time, meaning everyone's on the same page as soon as bookings are made.

## As Flexible As You Need

Monitor Reservation gives you ultimate flexibility. With a spectrum of options between self-service and entirely admin-controlled, we've worked hard to take the burden away from your staff without removing their control.

## *Users can book online or on-site*

### Walk-up Booking

At the reservation station the user initiates a reservation for the next available computer

### Queue Reservations

When all computers are in use the user can automatically book the next available computer

### Future Reservations

Allows a user to initiate a reservation to use a computer at a later date and time

### Block Booking

Allows multiple computers to be booked at a later date and time for a group of users

# *Your Complete Reservation System*

Monitor Computer Reservation  
consists of five separate,  
inter-linked components:

## Computer Reservation Administrator

Used by admin staff to access the system  
configuration and user account information

## Computer Reservation Booking Station

Used by members of the public within the site to  
create and manage their  
own bookings

## Computer Reservation Online Booking

A web-based  
version of the booking station which allows users to create  
and manage their own bookings

Easily manage bookings with **My Reservation**

## Computer Reservation Client Application

The component of the system which is installed on  
the public use computers within the site

## Computer Reservation Monitor

Displays queuing information (where in the  
queue they are) to the users

Windows & Apple  
compatible
