

Higher Education Solutions

Manage recurring transactions
and administration across
your campus

Want to make campus life easier?

Whatever your campus needs, now and in the future, Monitor is here to make things a little easier for students and staff.

Convenience

Turn student ID cards into campus-wide authorisation and payment cards. Students can use their ID cards for libraries, building and facility access, PC reservation, room and resources booking, printing, point of sale payment, and dozens of other uses.

Increase Security

With easy online account management and top-up kiosks, students have a secure, simple payment and admin solution. Money is transferred securely from online accounts to the organisation or vendor. No value is placed on the cards themselves, meaning lost or stolen cards are easily replaced and can't be used by others.

Recover Costs

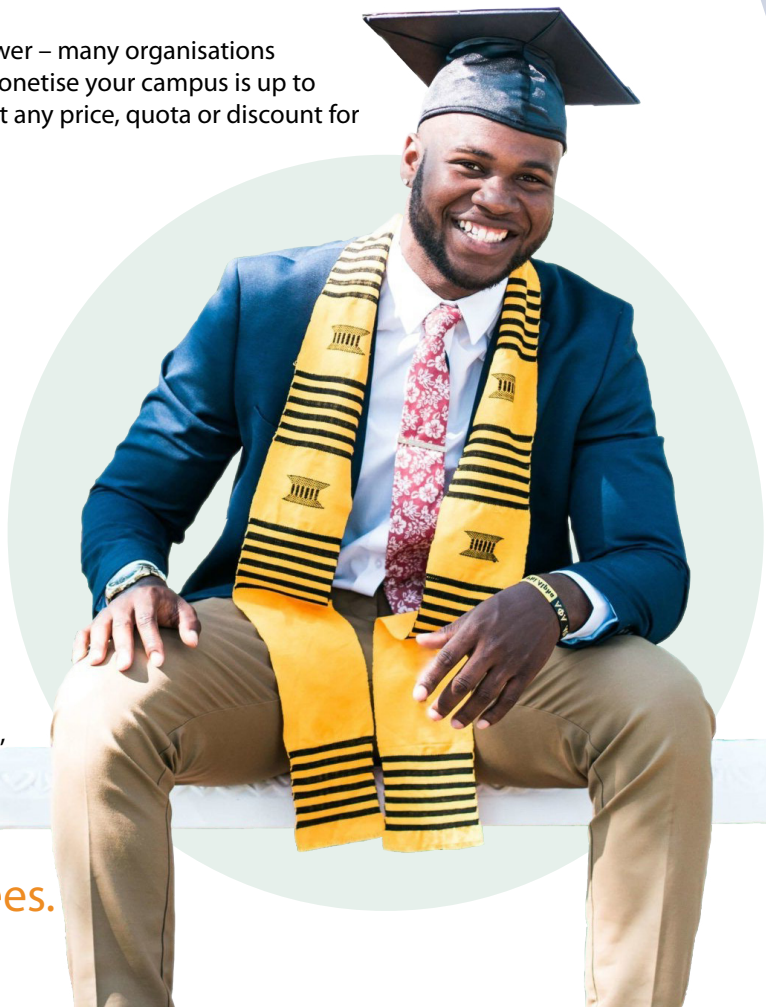

With money saved from printing alone – paper use, ink and power – many organisations find that Monitor pays for itself within months. How else you monetise your campus is up to you. With each transaction completely configurable, you can set any price, quota or discount for both groups and individuals.

Reduce Waste

With increased tracking comes increased user responsibility. Print pop-ups and Secure Find-Me user authentication means printers will only print what users expect and need right then and there. No more filling up recycle bins with unclaimed paper.

Easy administration

Higher Education campuses love the flexibility of Monitor's transaction management software. With flexible configurations, third-party support and powerful tracking and reporting capabilities, cost recovery has never been so straightforward.

Monitor. A better solution by degrees.

Print, Scan & Copy Management

Secure, fast and reliable, Monitor Print charges accurately and securely for all printing, scanning and copying on campus. From common room MFDs to single-user office printers, Monitor's configurable options allow you tighter control and cost recovery.

PC Reservation

Users manage their own bookings online or by simple walking up to PCs. Scalable and configurable with options for monetisation, your PCs will be busier than ever, all while freeing up your staff.

Room & Resource Reservation

Monitor's flexible booking and reservation system can be used for study rooms, recreation facilities, resource loaning, anything that involves people and places. With user-managed booking and authentication, all you need to decide is what to charge.

POS and eCommerce

Monitor provides a complete, integrated solution to all commerce on campus. Our user-friendly POS interface allows easy selling, with data capture for a stock management across multiple tills and stores. Monitor Online Ordering gives students the power to order and pay for canteen meals or other products in advance.

Online Account Management

Students can manage and top-up their accounts all in one place, from anywhere. Payments are managed and sorted securely behind the scenes, ensuring the money always goes where it needs to go, cutting down admin staff time.

Powerful Reporting

All of Monitor's solutions are managed through Supervisor Net. With an ever-expanding bank of data, you're able to generate informative, accurate and up-to-date reports.

A Modular Solution

Monitor is as flexible as you need

Top-up kiosks
