Accepts EFTPOS and all major credit cards, as well as most ID card solutions – magnetic stripe, barcode, proximity, Mifare

No staff involvement required

Unit has a 4G routor and acts as Wifi and a hotspot all in one

Maximise your laundromat's potential

Offer cashless capability with the Monitor Laundry Controller. The terminal allows users to pay for their laundry from their Supervisor Net account with their swipe card, removing the need for cash. The controller is on-line, allowing detailed monitoring and reporting to track and identify washing machine and dryer usage. This information enables you to optimise your laundry facility for maximum return on your investment.
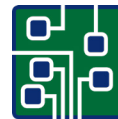

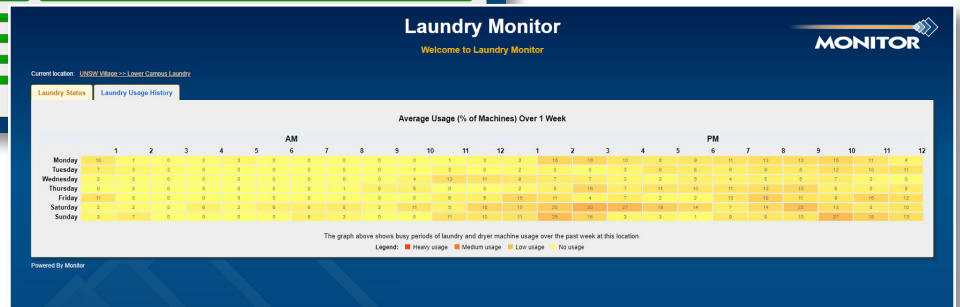

Laundry Webview

Laundry Webview allows users to easily view available machines and track their usage and spending, while staff can see at a glance which machines are more often used and where maintenance is required.

Users can easily see which machines are available

Machine usage stats at a glance gives you valuable insight

Our Laundry Controller manages up to 32 washers and/or dryers.

Tracking
Full details of each transaction captured including cycle type – wash, a dry or a dry top-off, the price paid, and any discounts

Reporting
Customised reporting on device usage and history

Security
The software talks to the central account management software Supervisor Net to check on funds available

User-Managed
Customers can purchase a swipe card and add value to an account, from cash or credit cards at a reload device or on the internet
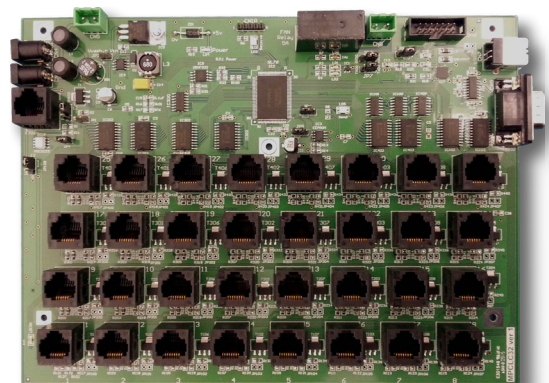

Multi-purpose Cards
Users swipe their card at the vending machine for washing powder, then again at the controller or kiosk to select a machine and cycle they wish to use

Easy Interface
The controller or screen displays which machines are 'In Use' and if so, the time remaining to complete the current cycle

Who carries coins anymore?
With the convenience of easy-to-manage cards, users are more likely to spend on laundry services
