Transaction Management

Meal ID

A complete meal tracking solution designed for institutions. Includes meal counting, dietary alerts and pastoral care reporting

Streamline the process!

Monitor's Meal ID solution is a convenient and efficient way to track total meals served and monitor dietary preferences in real time. Designed to suit institutions such as universities, schools or hospitals, Meal ID will streamline meal times.

Users swipe/scan cards on a card reader connected to Monitor's small ID Port device. User data is stored on a remote server running Supervisor Net, Monitor's powerful database system. Within seconds of a user swiping their card, a photo and any dietary alerts can be immediately populated on the screen of any computer/tablet running the browser based Meal ID application.

Use the data to improve your meal service, track student usage, receive instant dietary alerts and assist with pastoral care.

Speed up the queue!

- Lightning fast - see user details within seconds
- Suits any site - from a single lane to multiple different geographic locations
- Integrates with Supervisor Net for database management
- Designed to accommodate cash-free environments
- Configurable and customisable reporting tools
- User photo and food preference/allergies loaded into system to ensure the right meal to the right person
- Custom permissions - restrict users to certain locations
- Tailor multiple different meal profiles per day
- Manual meal number adjustment available
- Full pastoral care reporting

When integrated with **Supervisor Net**, Monitor's powerful database system, **Meal ID** picture pop-up feature allows quick recognition of users and enhanced security.

The screenshot shows the Monitor Meal ID application interface. At the top, it says "Head Office - Lunch" and "Tuesday, 11 Jun 3:23:29 PM". Below that is a "Guest Ticket" field with a search icon and an "OK" button. The main section is titled "History (6)" and lists the following users and their last card swiped times:

User Name	Last card swiped at	Count
LISA SMITH (2)	Today 3:22:13 PM	(2)
STEVE JONES (2)	Today 3:16:44 PM	(2)
JOHN DOE	Today 3:15:31 PM	(6)
JOHN SMITH	Today 2:04:35 PM	
JANE DOE	Today 1:52:08 PM	
FRED LEE	Today 1:52:02 PM	

Below the history list is a "Warnings" section with a "Gluten" alert. To the right of the history list is a large photo of a woman, LISA SMITH, with a red "(2)" next to her name. Below the photo is a "Warnings" section with a "Gluten" alert.

Extensive Reporting

Behind the scenes Meal ID is a powerhouse of data management. See a user's full transaction history, restrict access to certain locations, report on overall totals for a day/ week/month etc.

Everything that a user eats can be accounted for, from how many servings, to how many times they visited, Meal ID gives you a full overview of user eating patterns at your site.

- Student Meal tracking made easy!
- Stable and reliable, with support when you need it
- Seamlessly integrates with other Monitor modules
- Powerful online reporting capabilities with customisable parameters
- Three colour code system for student meals, monitor for serious food allergies in real time
- Fully scalable
