

MONITORBM

Transaction Management

On the Go

The simple yet powerful
solution for remote campus
transactions

What is On-The-Go?

Remote transactions

Monitor's On-The-Go solution is a mobile application that sits on a handheld mobile device. It can display bus trips, events and items for sale when there is a mobile connection available to the campus network, enabling campus transactions at remote locations.

Cashfree campus

The system is perfect for the smaller everyday exchanges, so students or other users no longer have to worry about carrying around cash.

These exchanges could be:

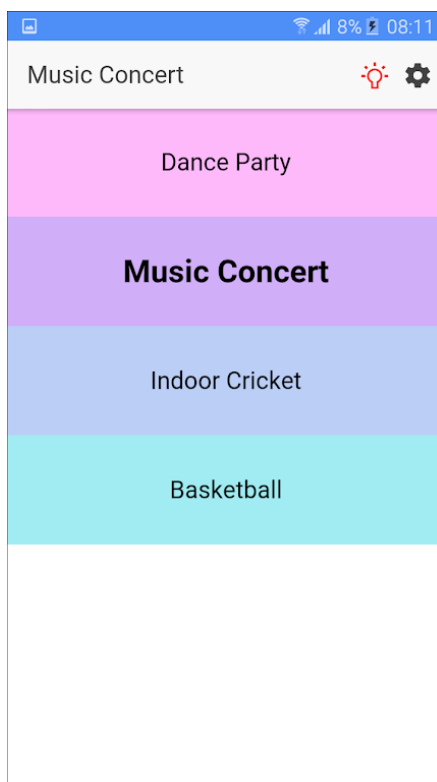

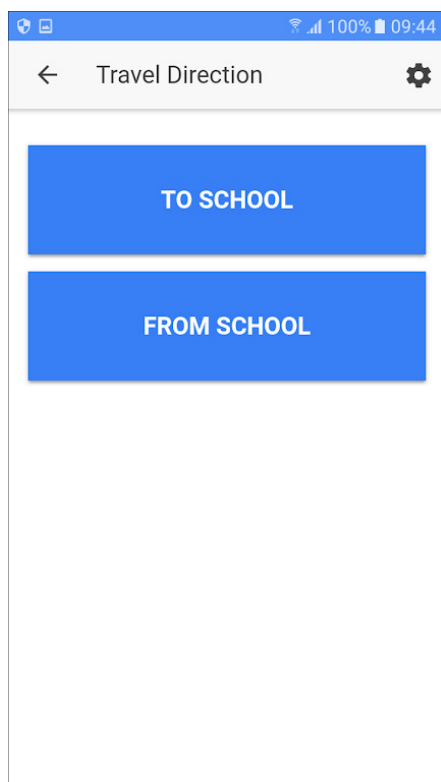

- ▶ Charging for bus trips, with support for multiple zones
- ▶ Charging for fundraising activities, such as sausage sizzles
- ▶ Monitoring attendance at events or classes
- ▶ Charging for events or activities such as sports or social events

It is incredibly flexible and can be configured to whatever extent you want or need it to be. Allowing for operators to only support bus trip exchanges or to support multiple exchanges.

Payments can be made by connection to the handheld mobile device via a campus card, users phone or other campus identifier. To top-up users can manage their accounts in one place, through the Monitor Campus Wallet. Where all information is securely stored making it easy to top-up online as necessary.

On-The-Go is a key part of our Commerce Suite. Adding to our existing solutions, it provides more comprehensive transaction data to administrators through Supervisor Net.

Feature Highlights

Benefits for the facility:

- Provides a cash free way to charge for simple items
- Removes the requirement to produce paper based ticketing systems
- Transactions occur quickly to process as many people as possible
- Gives the ability to be flexible about requiring payment up front
- Provides an additional level of security with the picture of the customer being able to be displayed on the unit
- Accepts a range of different authentication options including barcode, Mifare, mag stripe and QR code on phone
- Can be easily self administered to add and remove items and prices
- Works on a low cost hardware platform to reduce capital expenditure

Benefits for the customer:

- Provides a convenient payment method
- When configured as such, no child needs to be left on the side of the road if they have insufficient funds. They simply pay later.
- Older siblings can pay for their younger siblings rides or items
- Their account can be topped up on line and can be configured to automatically top up from a credit or debit card

Some of the features in Monitor On-The-Go are:

- Supports multiple 'Profiles', such as Bus Trips, Fundraising, Concerts on a single device
- Each profile may have as many items, (such as zones for a bus trip or cakes for a cake stand) as desired.

Requirements

- Supervisor Net version 8.0.0
- The application server must be accessible from the internet on port 42001 (HTTP) or 42002 (HTTPS - Default)
- 1 x OTG software connection license per device
