

## iPOS

An integrated point of sale solution  
designed for retail and hospitality  
in institutional and corporate  
environments.

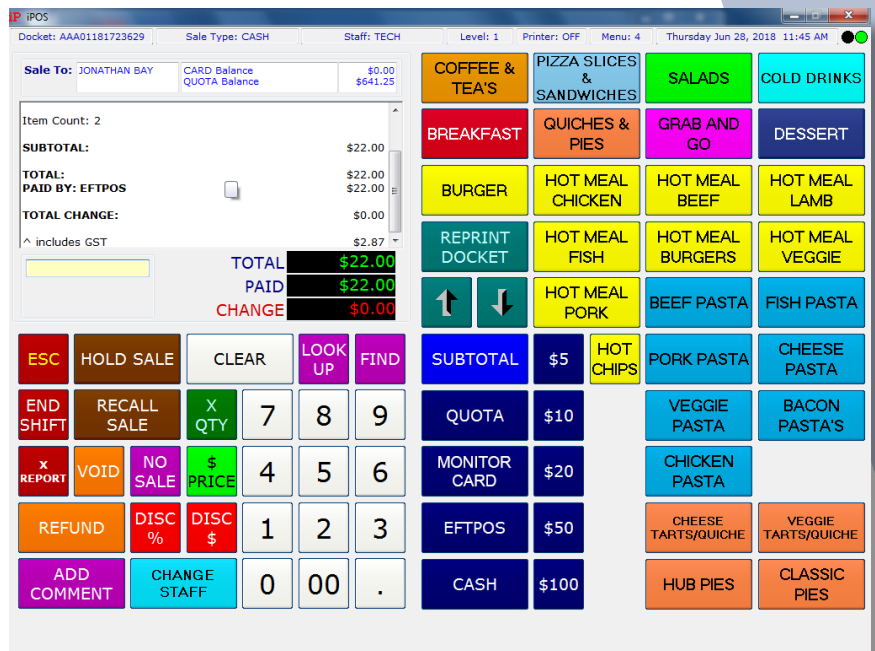

# Fast and easy

Monitor iPOS is a quick point of sale system with a powerful brain. Made to suit retail, hospitality and corporate environments, Monitor's iPOS feels like it was designed especially for you.

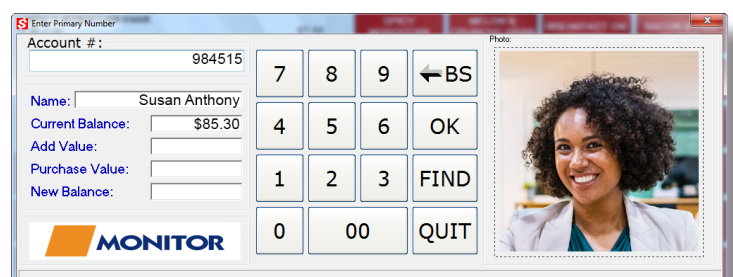

With a focus on fewer keystrokes and shaving time off the sale itself, the lunchtime rush will fly by without you wasting precious seconds waiting while your till unfreezes or payments process.

## Eliminate the queue!

- Lightning-fast – from button response to payment processing
- Suits any store – from a single one-till site to dozens of multi-till locations
- Integrates with Supervisor Net for database management and as a purse
- Designed to accommodate cash-free environments
- Configurable and customisable buttons and layout
- Nested menus with optional add-ons ensure you get your customer's order exactly right
- EFTPOS terminal integration
- Customisable tender types to account for special vouchers, site-specific payment types
- Multiple authentication options including accounts linked to existing ID/ membership cards, or even fingerprint scans
- Quota allowances for users can be set regularly
- Time-sensitive options for limited sales or regular 'happy hour' sales

When integrated with **Supervisor Net**, Monitor's powerful database system, iPOS's ID picture pop-up feature allows quick recognition for fast account sales

# Intelligent

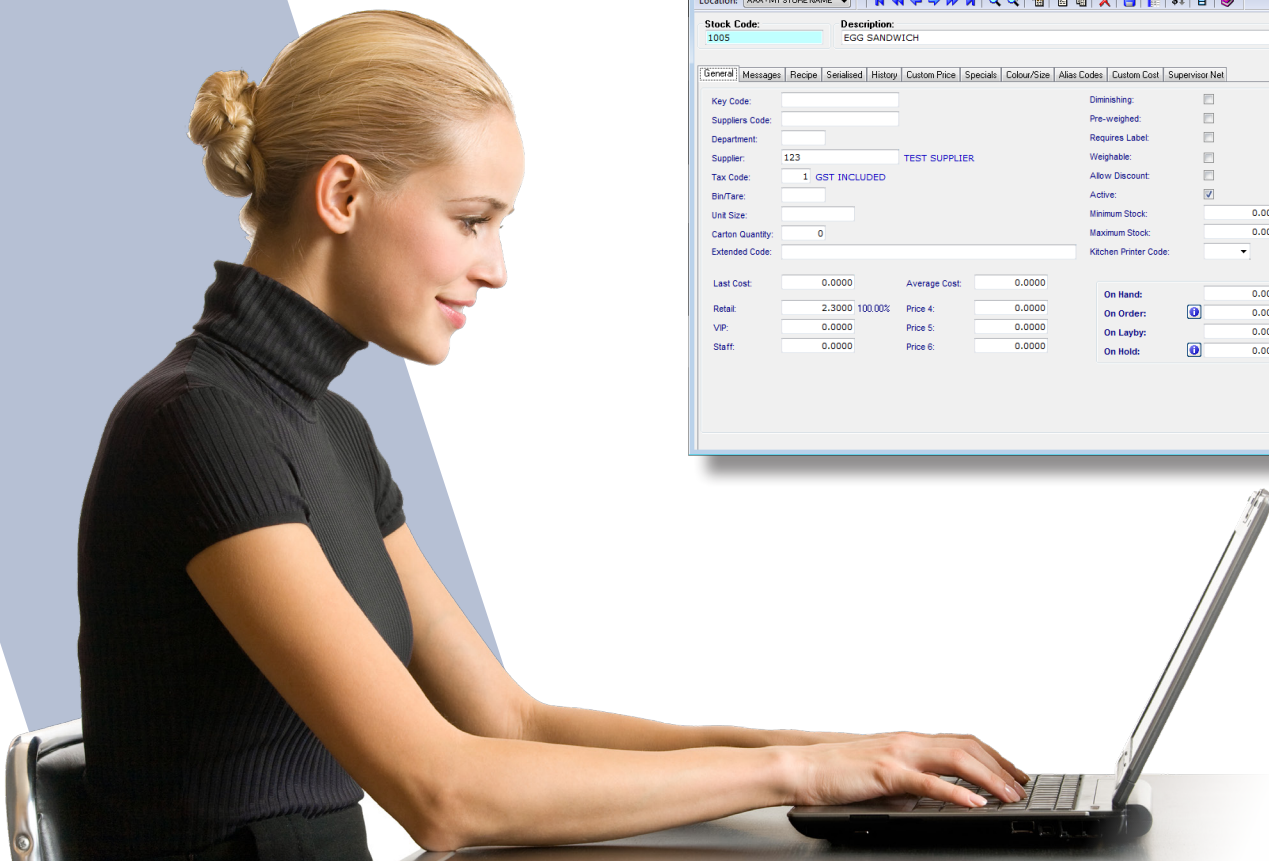

Behind the screens, iPOS is a powerhouse of data management. Tracking everything from stock levels to staff shifts and customer purchase history, iPOS can give you the information you need to manage your store into the future.

Everything that moves through the till can be accounted for, from size and colour of a pair of pants to the individual ingredients in a hamburger, iPOS allows you to know exactly what's going on.

## Organise your stockroom and back office

- Stable and reliable, with support when you need it
- Keep track with end of day/end of shift balancing
- Seamlessly integrates with Monitor Online Ordering for advanced ordering capabilities
- Taxes calculated automatically
- Powerful online reporting capabilities with customisable parameters, including live reporting
- Import data from CSV files and/or export in multiple formats
- Detailed stock management with multiple category types, stocktake, automatic reordering and manual input options
- Manage suppliers at a glance with linked transaction and account management
- Able to grow with your business

A screenshot of the iPOS Stock Maintenance software interface. The window title is "Stock Maintenance - AAA - MY STORE NAME". The "Location" dropdown is set to "AAA - MY STORE NAME". The "Stock Code" field contains "1005" and the "Description" field contains "EGG SANDWICH". The interface has several tabs: "General", "Messages", "Recipe", "Serialized", "History", "Custom Price", "Specials", "Colour/Size", "Alias Codes", "Custom Cost", and "Supervisor Net". The "General" tab is active, showing fields for "Key Code", "Suppliers Code", "Department", "Supplier" (set to "123 TEST SUPPLIER"), "Tax Code" (set to "1 GST INCLUDED"), "Blv/Tare", "Unit Size", "Carton Quantity" (set to "0"), and "Extended Code". On the right side, there are checkboxes for "Diminishing", "Pre-weighed", "Requires Label", "Weighable", "Allow Discount", and "Active" (checked). Below these are input fields for "Minimum Stock" and "Maximum Stock", both set to "0.0000". At the bottom, there are input fields for "Last Cost" (0.0000), "Average Cost" (0.0000), "Retail" (2.3000 100.00%), "VIP" (0.0000), "Staff" (0.0000), "Price 4" (0.0000), "Price 5" (0.0000), "Price 6" (0.0000), "On Hand" (0.0000), "On Order" (0.0000), "On Layby" (0.0000), and "On Hold" (0.0000). The "On Order" and "On Hold" fields have a small icon next to them.
