

MonitorBM & FE Technologies

We're thrilled to introduce a powerful collaboration between FE Technologies and MonitorBM, aimed at revolutionising your library experience. With our integrated services now available on FE Technologies Kiosks, you'll enjoy a host of new features designed to make your library visits more convenient and efficient than ever before, without the need for additional kiosks and hardware.

Here's What's New:

Account Control: MonitorBM seamlessly integrates with all major Library Management Systems (LMS). Now, library guests can effortlessly check their account balance and add funds directly from the kiosk. Managing your library account has never been more accessible.

Guest Tickets: Even if you're not a library member, you can now print a guest ticket and add funds to it. These funds can be used for various services, such as printing and photocopying, making your library accessible to everyone.

Printing Made Easy: Printing is now a breeze. Users can release and pay for their printing at the kiosk, with the added convenience of adjusting printing attributes like copies, colour, and size. Guests can even preview their documents on the kiosk screen for complete control.

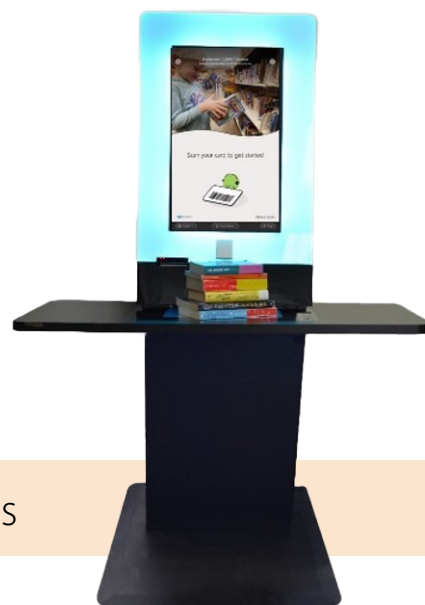

USB Port: Need to print from a USB drive? No problem! FE Tech's kiosks can be equipped with USB ports, allowing users and guests to print and pay for files from their USB devices.

Funds Calculator: To simplify adding funds to your account, we've introduced a Photocopying and Printing Calculator right on the kiosk. It's a handy tool to help users manage their printing budget.

Fee and Fine Payments: With LMS integration, guests can conveniently settle any outstanding fees and fines right at the kiosk. No more delays or hassles – just quick and easy payments.

MiniPOS Integration: With MonitorBM's MiniPOS integration, users can conveniently purchase library items or make donations directly at the kiosk, enhancing your overall library experience.

This partnership reflects our shared commitment to innovation and providing you with the best possible library services. Our goal is to make library visits seamless and enjoyable, and with these enhancements, we're confident you'll find it easier than ever before.

FURTHER MONITORBM SOLUTIONS

Free up staff time with self-service kiosks
