

MU2 Terminal

The MU2 Terminal is the latest in cost effective and intelligent solutions MonitorBM has to offer.

WIRED ACCESS CONTROL TERMINAL

Monitor's After-Hours Access solution provides a secure, flexible, and cost-effective way for libraries and community facilities to extend their services beyond standard opening hours. Built around the MU2 smart terminal and integrated with your existing Library Management System (LMS/ILS), the solution ensures that only authorised patrons can enter your premises during extended or unstaffed periods

Monitor integrates with most major ILS/LMS platforms to synchronise patron records and apply your library's access policies automatically. Using this connection, Monitor can:

- Identify eligible patrons based on your configured rules
- Assign users to permission groups for after-hours access
- Apply and revoke access rights in real time

Real-time authentication with monitor, Azure, AD, LDAP or LMS

Multiple authentication modes (card, PIN, 2FA SMS)

Support for QR-code self-registration

8x relay (wired or wireless) outputs for controlling devices such as:

- Door release mechanisms
- Security cameras
- Lighting systems
- Other building automation systems

Integration with your security systems

Instant application of subscription or extended-hours entitlements

Secure audit logging for all access attempts

MU2-M Terminal

The MU2 Terminal is the latest in cost effective and intelligent solutions MonitorBM has to offer.

BATTERY POWERED TERMINAL

Powered by a high-capacity internal battery, the MU2-M can operate independently for more than two full days on a single charge. A completely mobile operation

Real-time authentication with monitor, Azure, AD, LDAP or LMS

Multiple authentication modes (card, PIN, 2FA SMS)

Support for QR-code self-registration

Wireless relay outputs for controlling doors, gates, turnstiles, or equipment

Instant application of subscription or extended-hours entitlements

Secure audit logging for all access attempts

This makes it ideal for:

- Pop-up or temporary spaces
- Dining halls for meal validation
- After Hours authentication for libraries
- Mobile community outreach services
- Campus Events & weekend programs
- Areas undergoing renovation where power may not be available
- Backup access control during power interruptions
